Summary

Trained in HTML5, CSS3 and Javascript. Proven record in creating remarkable and responsive solutions in the least possible time. Have 2+ years of experience in crafting and testing user-friendly interfaces, debugging and updating existing projects, and ensuring timely project deliverables. Looking forward to demonstrating my proven abilities in optimizing web functionalities in a challenging and motivating work environment.

Experience

Junior Web Developer

O'Prime

Jun 2023 - Present (2 months)

First task was to redesign the CV generator module with HTM and CSS

Bugs fixing through templating files (.tpl)

confidence and knowledge working with .tpl files

Project Lead Developer

MissingDoc

Jan 2022 - Apr 2023 (1 year 4 months)

This project MissingDoc was to come up with a responsive WPA platform built with ReactJs and linked to Laravel for data. The project aimed to reduce the rate of loss of missing documents such as ID Cards, Passports, Driver's licenses in the national territory of Cameroon. Onsite we would have agents that lotter around public spots to pickup lost docs and upload the platform. Owners of it would have to lookup their lost item on the same platform and if found, they pay a little token for the service.

Open Source Developer

LanTube

Sep 2021 - Sep 2021 (1 month)

App built with ReactJs the streaming of video contents on local Network.

Its a Youtube-Like app which runs on LAN (Local Area Network)
